

J. QUALITY REVIEW PROCEDURE FOR PILOT PROGRAMS (Old Class B)

1. Through a quality assurance review process directly involving the Program Medical Director (PMD), developed by the local program and approved by the PMD, the respective Regional Medical Director (RMD) and the State EMS Medical Director, the local program will review the runsheet and patient outcome records to determine the appropriateness of each individual use of the skill or administration of the medication. If the pilot procedure or medication is judged to be an appropriate intervention, the occurrence is added to the jurisdictional database and forwarded to the RMD and the State EMS Medical Director on an annual basis unless otherwise specified.
2. If a variance or question arises from the review of the case, a case review conference will be held with the provider, the PMD, and, if indicated, the on-line medical consultant with the summary of the findings to be reported to the RMD and the State EMS Medical Director.

Quality Assurance Mechanism for PILOT Programs and Procedures

* Approved by PMD, RMD, MIEMSS State EMS Medical Director
